

Globesync Community Research and Sustainability Conference (GlobeCoReS 2025)

"From Evidence to Legacy: Transforming Research into Sustainable Action"

Conference Schedule

DAY 1	Date: 3 December 2025 Wednesday Venue: Curtin University Malaysia
Time	Programme
08:00 - 08:30	Registration & Morning Refreshment
	Pre-Conference Workshop:
	Bibliometrics Analysis via VOSviewer and Scientific Databases Workshop
08:30 – 09:00	Pre-Conference Welcome & Briefing • Welcome Remarks by Professor Dr. Roy Rillera Marzo Chairman of GlobeCoReS 2025 and Dean, Faculty of Humanities and Health Sciences, Curtin University Malaysia
09:00 - 12:30	Morning Workshop (Interactive Session):
	 Topic 1: Introduction to Bibliometrics via Scopus This session introduces the foundations of bibliometric analysis, including key indicators such as publication count, citation metrics, and the h-index. Participants will learn how to develop search strategies in Scopus, retrieve relevant publication data, and explore research trends across disciplines. Topic 2: Introduction to VOSviewer for Visualising Research Landscapes This session introduces the basic functions of VOSviewer and how to use it to visualise research patterns. Participants will be guided through importing Scopus data, generating network maps, and exploring different layout types to identify research clusters, influential authors, and emerging topics.
12:30 - 14:00	Networking Lunch / Zuhr Prayer
14:00 – 17:00	Afternoon Workshop (Collaborative Session): • Topic 3: Practical Bibliometric Mapping using VOSviewer - This session covers four key types of bibliometric analysis: co-authorship, co-occurrence, co-citation, and bibliographic coupling. Using pre-prepared datasets, participants will explore how to generate and interpret different map types to uncover collaboration patterns, thematic structures, and knowledge flows in the literature. • Topic 4: Interpreting and Applying Bibliometric Insights - This session guides participants through reading and refining bibliometric maps, including adjusting visual elements and filtering data for relevance. It focuses on how to draw meaningful conclusions from the maps and apply insights to literature reviews, publication planning, research networking, and strategic decision-making.
17:00 – 17:30	Real Action Research Collaboration & Networking Opportunities
17.20 19.00	• Global Survey Initiative
17:30 – 18:00	Certificate Distribution & Group Photo

Title	Bibliometric Analysis for Research Visibility: Scopus & VOSviewer Essentials
Date & Time	3 December 2025 Wednesday 08:00 – 18:00
Speaker,	Speaker & Trainer:
Trainer, and	Dr. Armstrong Ighodalo Omoregie,
Facilitator	Borneo Regionalism and Conservation, School of Built Environment, University of Technology Sarawak, Malaysia
	Professor Dr. Roy Rillera Marzo
	Chairman of GlobeCoReS 2025 and Dean, Faculty of Humanities and Health Sciences, Curtin University Malaysia
	• Dr. Hana Chen
	Chair, Learning & Teaching, Faculty of Humanities and Health Sciences, Curtin University Malaysia
	Facilitator:
	Mdm Valerie Anak Velina Nagreg Head of Department of General Studies, Faculty of Humanities and Health Sciences, Curtin University Malaysia
Description	This hands-on workshop introduces participants to the fundamentals of bibliometric analysis using Scopus and VOSviewer. Designed for researchers across disciplines, the session covers key bibliometric indicators and tools fo mapping research output, collaboration networks, and thematic trends. Participants will engage in guided exercises using pre-prepared datasets and learn to conduct four core types of bibliometric analysis: co-authorship, co occurrence, co-citation, and bibliographic coupling. The workshop supports researchers in using bibliometric insights to inform publication strategies, enhance research visibility, and plan collaborative projects.
Scope & Aims	 Introduce the principles and practical applications of bibliometric analysis in academic research. Equip participants with the skills to search, extract, and prepare bibliometric data using Scopus. Train participants to use VOSviewer for creating and interpreting visual maps of research networks and trends. Demonstrate four key types of bibliometric analysis: co-authorship, co-occurrence, co-citation, and bibliographic coupling. Encourage use of bibliometric tools to support strategic publishing, literature reviews, and evidence-based research planning.
